SUMMARY

Hi, my name is James, I am a fullstack developer that has 3 years experience since 2019. I have been involved in 6 different projects and played different roles on the team. My current tech stack is using laravel, vue js and reactjs for web development, react native for mobile development but I am open to learn new skills and techstack to keep improving my skill sets.

My goal is to provide the biggest value to an organization or client to make their product successful in the market or transform their business from offline to online to increase their revenue with the latest technology.

PROFESSIONAL EXPERIENCE

SPARKSOFT SDN BHD - (Full Stack Engineer)

Jun 2019 – Feb 2023

A startup company that is headquartered in Malaysia. It is a company that is transforming the software development and digital marketing landscape. Sparksoft mainly offered clients digital marketing services with their own invented system.

Responsibilities:

- Determines operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions.
- Develops software solutions by studying information needs, conferring with users, and studying systems flow, data usage, and work processes.
- Build reusable code and libraries for future use.
- Develop new user-facing features.
- Collaborate with other team members and stakeholders.
- Developing features to enhance the user experience.

1. Membership Suite - <https://www.membershipsuite.app> (2022-2023)

Membership Suite is an all in one membership management software that is able to eliminate repetitive manual tasks with easy-to-use automation and increase member retention.

- Revamp the back office web application interface
- Provide tech solution and implement it independently for new requirements
- Responsible to compile and submit the app to all app store platform
